

Project Terms & Conditions

Once the project begins, we cannot accept any changes to the design until the installation is completed. After the project is delivered, we will open a new project for changes, edits and add-ons if required.

We will evaluate your design before the start of the project to determine whether your project will require extra hours.

Payment in full is required prior to the start of the project. Completion is typically 3-5 weeks from the date of payment.

The Template Installation Service includes a maximum of 10 hours of programming labor & support. Most designs that include a tour and member's area template are completed well within the 10 hour limit.
